2. Literature Review

2.1 Feedback & Evaluation

Lecturer's assessment of the project (to be completed after the project review).

Date	Lecturer's Feedback	Evaluation

2.2 Suggested Improvements

Areas where TawzeefAI can be enhanced in future versions:

- **Bilingual CV support:** Parse and score résumés written in Arabic, English, or a mix of both, including Arabic name and education formats.
- **Fine-tuned matching model:** Fine-tune the embedding/ranking model on anonymized Egyptian hiring data to improve match accuracy for local job titles and universities.
- **Expanded bias auditing:** Add automated fairness checks (e.g., gender, university, name, age, and location) with periodic bias reports for HR.
- **Skill-gap analysis:** Show each candidate which required skills are missing and suggest relevant courses or learning resources.
- **Job-board integration:** Connect with LinkedIn, Wuzzuf, and other recruitment platforms to import applicants automatically.
- **Calendar integration:** Sync interview scheduling with Google Calendar / Outlook and send automatic email or WhatsApp reminders.
- **Explainable ranking:** Provide a clearer, per-criterion explanation of every score so HR can review and override decisions easily.
- **Voice and video screening:** Add optional AI-assisted first-round interview screening with human review of every result.
- **Scalability and monitoring:** Add caching, queueing, and monitoring dashboards to handle high-volume hiring seasons.

2.3 Final Grading Criteria

Breakdown of marks based on documentation, implementation, testing, and presentation (to be filled in).

Criteria	Description	Max Marks	Marks Obtained
Documentation			
Implementation			
Testing
